- Participated in agile development processes, including sprint planning, daily stand-ups, and retrospectives.
- Collaborated with cross-functional teams to understand business requirements and translate them into technical solutions.
- Collaborated with team members to optimize and refactor existing code, improving performance and maintainability.

SOFT CAMPUS - ANGULAR FULL STACK DEVELOPMENT

Overview:

Soft Campus is a cutting-edge school management website developed as an Angular Full Stack project. It is an ongoing initiative aimed at revolutionizing administrative and educational processes within educational institutions. This integrated platform is designed to enhance management, communication, and collaboration within schools.

Key Features:

- **Student Information System:** Centralized database for managing student records, enrollment details, academic performance, and attendance. Ensures easy access for teachers, administrators, and parents.
- **Attendance Tracking:** Simplifies the process of recording and monitoring student attendance, providing real-time insights for timely interventions.
- **Gradebook and Academic Analytics:** Allows educators to input grades, generate report cards, and analyze academic performance. Academic analytics offer valuable insights into student progress.
- **Communication Hub:** Serves as a communication hub for teachers, students, and parents, facilitating seamless interaction through announcements, event updates, and academic information.
- **Online Assignments and Assessments:** Facilitates the creation and submission of assignments online, promoting a paperless approach to assessments. Enables efficient grading and real-time progress tracking.
- **Fee Management:** Simplifies fee collection and management. Parents can conveniently pay fees online, and administrators can track financial transactions and generate reports.
- **Timetable Generator:** Automates the creation of class schedules, optimizing resource utilization and ensuring a balanced curriculum. Easy access for teachers and students.
- **Library Management:** Integrated library management system for efficient cataloging, tracking borrowings, and managing library resources. Online catalog and availability check for students and teachers.
- **Security and Access Controls:** Prioritizes data security with robust access controls. Role-based permissions ensure that sensitive information is accessible only to authorized personnel.

CERTIFICATIONS

- Computer System Security E & ICT Academy, IIT Kanpur
- Python Full Stack Ducat India
